Hi everyone,

Does anyone know of a way to apply a numbering sequence to a list of notes in CAXA draft. I have not been able to find an easy method using the **CAXA text** editor See the attached video for an example which i utilize in Autocadd.

Thanks.

Peter

Peter,

That isn't currently supported as a general text tool. However, you can use the Technical Requirement Tool to achieve the result. Just enter a blank title and create the lines of text, it will be numbered fro you.

Thanks,

Blake

Thanks Blake..

Thats Brilliant. I have never used that technical requirement tool before.

In fact I never even knew it existed 😊

That is a great tool and it even allows for creating your own standard notes. No more re typing the same notes over and over again.

TODAY IS A GOOD DAY IN CAXA LAND 😊

Peter
