

IRONCAD DRAFT - OPTIONS – SYSTEM – AUTO LAYER RULE

The following image is of the “Auto Layer Rule” dialog box, which is opened within “Options”.

Note that it’s necessary to have a drawing open that contains the “Styles” (Layers) that you want to apply within these “Global Settings”. If at any time CAXA DRAFT can’t find the selected “Styles” in the current drawing, it will revert to it’s default settings.

For drawings with only the eight “System” layers available, these settings should be used.
